UT Austin, Explore UT aims to inform students, parents, teachers and community members from across the state about the importance of the public research institution and higher education in Texas. The day-long event invites Texans of all ages to experience robust research experiences, hands-on demonstrations, and experiments, and participate in the richness of the university's scholarship and knowledge. Explore UT seeks to broaden the horizons of students in Texas and motivate them toward achieving higher education after high school. It seeks to help parents and teachers encourage the excitement of learning and discovery, and welcomes alumni to reconnect with the institution that prepared them for their careers.
